

About The Company-

Vultus with over a decade of experience in HR software industry now goes on cloud to build a strong human capital for organizations by building software that is accessible, affordable and easy to use.

The only cloud based solution that lets you discover talent, connect with HR and find the most appropriate talent based on your needs. A complete end-to-end applicant tracking system that cater to every need of HR managers at different levels and integrates seamlessly with your existing HR system. Vultus remains with you till your prospect becomes hire.

Challenge Area-

Today Companies need resumes in standard format at one single location which usually is not the case. Vultus usually gets resumes scattered in email inbox, shared folder or desktops. The real challenge was to connect resumes back to database where matching of profiles can be done as per roles advertised. Resumes being the starting point of Recruitment journey always finds attention to an extent of managing CV data, gathering inputs for Interview scheduling, further skill mapping and ranking resume close to the requirement. Vultus for their 'Recruit' was definitely waiting for a strong CV parser at its core which ended with the search of RChilli.

RChilli's Contribution-

With coming in of RChilli comes automation, accuracy, speed and efficiency in hiring. Now the ATS handles resumes in all different formats (PDF, word, txt etc...) perfectly from ATS under 'Recruit'. As soon as the resume gets parsed, Recruiters see each unique candidate profiles with information presented in a simplified form and can schedule interviews faster. Resume parsing being at the core, puts CV data straight into candidate databases saving endless hours of resume entry, data sorting and matching later on.

Overall Impact-

Now Vultus customer can easily search online resumes on Naukri, Monster or other Job boards, download them and parse it using RChilli. This spares ample amount of time to HR managers to interact with applicants and hire the best amongst them. RChilli's resume parser cannot-only Parse CV but Connect to different profiles of candidates using Social Profile Search option. The success of any hiring campaign depends upon the information gathered and we know how best to manage it. That is why Vultus has chosen RChilli to empower its ATS 'Recruit' to automate hiring and cater the needs of next generation workforce that mostly stays online.

With RChilli, Vultus aims to cater the needs of Recruiting, Staffing firms, Job boards for Talent Acquisition.
