WHAT IS
RCHILLI RESUME PARSING?

RChilli resume parser is a deep learning/AI framework that identifies complete information from resumes and enriches it through its taxonomies. It extracts candidate data from resumes in 140+ data fields through REST API.

How Can RChilli Resume/CV Parser API Fit into Your Business?

- Auto-fill data fields from candidate resume on your candidate apply page
- Improve search results by indexing its taxonomy ontologies to Solr/Elasticsearch
- Bulk parsing of resume feed imported from a partner
- Configuration of data fields available for a bias-free recruitment
- Complete candidate information from scanned resumes and through emails

How Does RChilli Resume/CV Parser Help You?
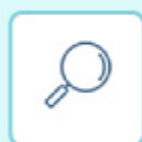

- Candidates can fill profile in less than 10 sec
- Easily import millions of resumes overnight
- Quickly integrate the 'apply now' button on your career page
- Get resume data from emails in less than two seconds
- Enhance search results of Solr/Elasticsearch with Taxonomies
- Remove unconscious bias through Switch on/off fields

A Scalable Resume/CV Parsing Solution

- Rest API Integration
- Parse Resumes in Bulk
- Parse Resumes from Emails
- Switch On/Off Fields
- Apply Now Button with 2-min Integration
- Document Template Creation
- Executive/Management Summary Creation
