FASTER IN ORACLE HCM

Automate the recruitment process while saving time to find the best-in-class talent without hampering positive candidate experience. Enhance your HR spectrum with AI-driven RChilli resume parser and build a positive brand image.

The slow, tedious, and error-prone manual hiring process carries implications for companies including:

Poor candidate experience

Frustrated recruiters and hiring managers

Laid-back talent acquisition process

Missed hiring potential with high applicant drop off rates

Why Automating the Recruitment Processes is Gaining Momentum?

- Introduces diversity and inclusion
- Removes unconscious bias
- Improves quality of hire
- Supports an all-inclusive hiring process

What Gives RChilli Resume Parser in Oracle HCM An Extra Edge?

- Customized Data Fields Extraction
- An Array of 25+ Parsed languages
- Uncomplicated Pricing Module
- A Dedicated Account Manager
- Positive Candidate Experience
- Able To Parse Resumes In Different Formats

If you want to attract the best-in-class talent and speed up your time-to-hire
