## USE CASES OF SEARCH & MATCH ENGINE

RChilli Search & Match Engine provides  
the following matches:

- ✓ Job to Jobs
- ✓ Job to Resumes
- ✓ Resume to Jobs
- ✓ Resume to Resumes

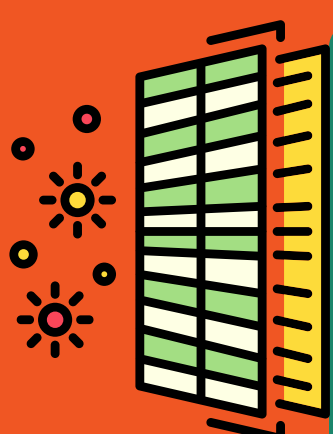

### Strings to Advanced Query

Now you can easily refine your search by adding  
tags for location, company, skill, job profile,  
experience level, degree, language, and more.

### Facets and Filters

They allow users to refine their search queries  
and discover more relevant information about  
the candidates they seek.

### De-Duplication

Helps users to avoid indexing duplicate records  
in the search engine.

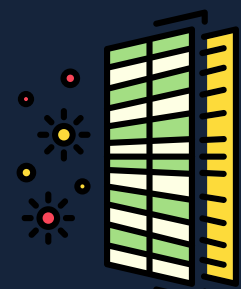

## WHAT ARE THE FEATURES OF RCHILLI SEARCH & MATCH ENGINE

1

### GEOGRAPHICAL SEARCH

Easily filter your search for localized candidates by geography using  
Geocodes, City/State/Country, or distance range (KM/mile). Find the  
perfect fit for your location-specific needs!

### FILTERS & FACETS

Filters and facets aid in refining queries and exploring  
search results effectively.

2

3

### PAGINATION

Pagination enables users to retrieve data in batches with  
customizable page sizes, ensuring efficient retrieval of records  
in API calls.

### CUSTOM WEIGHTAGE/SCORING

Differentiate search results based on "Good-to-Have" and  
"Must-to-Have" criteria. Score resumes in search results based  
on keyword matches, enhancing the relevance of the search.
