RChilli Resume/CV Parser

RChilli's resume parser is a deep learning/AI framework that identifies complete information from resumes and enriches it through its taxonomies. It extracts candidate data from resumes in 140+ data fields through REST API.

The process converts an unstructured form of resume data into a structured format.

It is a program that analyses a resume/CV created in any document format, such as DOC, DOCX, PDF, RTF, TXT, ODT, HTM and HTML, DOCM, DOTM, DOT, DOTX and extracts into a machine-readable output such as XML, JSON format through API.
