

RChilli Search & Match Engine 2.0

RChilli Search & Match API allows you to search and match candidates and jobs with great relevancy and accuracy than simple database searching and matching algorithms.

It filters resume data according to global industry-standard ontologies and taxonomies. You can search resume or JD based on your search keyword out of the total resumes and JDs indexed. And also, find resumes/jobs matching your input documents.

The lightning-fast cluster computing technology of Search & Match Engine will help you get the perfect candidate through normalized and enriched data e.g. skills/ competency, domain, location, education, city, company, and job title.

How Can RChilli Search & Match Engine 2.0 Fit into Your Business?

Get similar job recommendations matching a job (Job to Jobs)

Get more job recommendations to the candidate (Resume to Jobs)

Get more candidate recommendations for a job position (Job to Resumes)
