RChilli 8.0.0

05. About RChilli

What is RChilli 8.0.0?

At RChilli, we build impactful AI tools for the recruitment industry that can help both recruiters and candidates.

RChilli 8.0.0 brings to you a more trusted and scalable resume parser.

We created this version by using the most authentic, best-in-class and latest technologies. It is the result of years of research on AI, NLP, and ML.

It feels proud to announce its launch because now everyone will have access to the latest technology. You can engage the best talent and focus on what is important for you.

Why We Built RChilli 8.0.0?

What was the vision behind creating this version?

We always ensure to meet the expectations of our users.

Everyone looks for faster resume data processing. Many clients approached us with this requirement and we decided to deliver it.

In this version, we focus mainly on providing

- the most trusted and latest technologies
- an inbuilt mechanism of recent and reliable technologies of ML
- quick release of new modules and languages

Our users can now rely completely on our technology for data processing.

What's New in this Version?

You will see a qualitative change in RChilli's solutions.

There is a new technology stack behind this version. Our powerful deep learning resume parsing module now delivers smarter identification of resume data and provides better results.

Now, we provide 140+ data fields in which the parser can extract resume data.

Let's have a look at a few exclusive features:

Simplified JSON

You will see a remarkable improvement in JSON. It has a more simplified structure.

Now we are providing details of the following fields:

- Phone Number
- Website URL
- Address
- Email Address
- Location
- Salary
- Resume Language

Confidence Score

The confidence score is based on how accurately our parser thinks about the extracted fields.

We provide a confidence score for the following fields:

- Name
- Email
- Phone
- Address
- Institution and sub-institution
- Degree
- Employer
- Job Profile

Taxonomy-Driven Fields

Skills

- Get skill type and skill alias of the candidate's skills.
- Get formatted name of the skill.
- Get ontology details of the skills e.g. from which category it belongs (branch or domain and subdomain)

Job Profile

- Get formatted name of the job profile.
- Get job profile alias, related skills and proficiency level of the job profile.

Segregated Skills

- Skill Type- Get information about the type of skills e.g. soft skill, behavioral skill, etc.
- Evidence- Get evidence from where the skills have been picked up from the resume.
- Last Used- Information about the skill last used by the candidate.
- Alias- Get the alias of the skills.
- Ontology- Get the information of the field from where the skill belongs.

Explore the Power of RChilli 8.0.0

Everyone looks for fast and quick resume processing.

RChilli 8.0 promises this with advanced technology.
